JPS Receives Large Order from JX Nippon Oil & Energy to Remove Existing Units

JGC Project Services Co., Ltd. (JPS) has won a contract from JX Nippon Oil & Energy Corporation in October 2010 for the removal work on its existing 2TP/3TP/DW units at its Negishi Refinery.

1. Owner of the Project: JX Nippon Oil & Energy Corporation
2. Location of the Work Site: Ohtori-cho, Isogo Ward, Yokohama City, Kanagawa Prefecture
3. Delivery date: February 2011
4. Background to the Project:

With the former Nippon Oil Company, Ltd. and the former Nippon Mining Holdings, Inc. merged into JX Nippon Oil & Energy Corporation, the new company is now starting to integrate their production facilities.

As an initial step in the integration, this project is to remove the existing No.2 and No.3 atmospheric distillation units and the dewaxation unit at its Negishi Refinery.

JPS, making the most of the experience so far gained from handling numerous EPC projects, assures clients of its best services meeting their entire satisfaction.
