JPS Wins Contract for Restoration Work on Aboveground Facilities at the Kuji National Petroleum Stockpiling Base of Japan Underground Oil Storage Co., Ltd., Devastated by the Great East Japan Earthquake -

JGC Project Solutions Co., Ltd. (JPS) has been awarded the contract by Japan Underground Oil Storage Co. Ltd. for restoration work on the aboveground facilities at its Kuji National Petroleum Stockpiling Base, which suffered severe damage as a result of the March 11 Great East Japan Earthquake.

The restoration work will cover practically all the aboveground facilities at the base.

With winter coming shortly, the restoration project has already started with work having begun on the steam generation and air compressor facilities.

JPS is committed to contributing to the reconstruction of the disaster-hit Tohoku Region through the early completion of this project to the client's entire satisfaction.
